

## SCHOOL BASED CLINICIAN

The School Based Therapy program is offered to any youth in Farwell school systems that may be in need of mental health services.

During the School Based program a clinician would complete a mental health screening during a face-to-face contact. Results of the screening would be shared with the youth and his/her parent/guardian. There is no fee for and it is your choice if you want to follow the recommendations.

The School Based Clinician would then help link the youth with the appropriate services. Service categories include: Substance abuse; Anger; Truancy; Depression; Suicidal thinking; Trauma; Anxiety/heightened worries; Signs of mental/emotional distress

### Objectives of School Based Therapy:

- To meet with youth who are not reaching their potential or achieving success.
- To assess their mental health concerns.
- To link youth and families with services to help them through these challenges.
